**Q.1** **Tick (✓) the correct option:**

- PTO**

10. Number of children of age 0-4 year per thousand females of reproductive age is called as;

i) ☐ Crude birth rate                      ii) ☐ General fertility rate

iii) ☐ Child-woman ratio                  iv) ☐ Total fertility rate
  11. The broad based and narrowing upward pyramid of a country indicates that its population is;

i) ☐ Stable                                        ii) ☐ Expanding

iii) ☐ Contracting                                iv) ☐ None of these
  12. Which of the following factors plays no role in controlling the size of world population?

i) ☐ Fertility                                      ii) ☐ Migration

iii) ☐ Mortality                                    iv) ☐ Age levels
  13. According to the size of population which country is the fourth largest in the world?

i) ☐ USA    ii) ☐ Russia

iii) ☐ Indonesia                                   iv) ☐ Brazil
  14. The ratio between total population and cultivated area expressed in terms of persons per square kilometer of cultivated land is known as;

i) ☐ Arithmetic density                      ii) ☐ Agricultural density

iii) ☐ Critical density                           iv) ☐ Nutritional density
  15. Which of the following regions is population wise the biggest region of the world?

i) ☐ East Asia                                     ii) ☐ South Asia

iii) ☐ Western Europe                        iv) ☐ North Eastern North America
  16. The ratio between young population and aged population is called as;

i) ☐ Age dependency ratio                  ii) ☐ Young dependency ratio

iii) ☐ Ageing index                            iv) ☐ Old dependency ratio
  17. According to world population data sheet 2016 how many individuals are annually added to the world population?

i) ☐ 86.8 million                                ii) ☐ 87.8 million

iii) ☐ 88.8 million                                iv) ☐ 89.8 million
  18. According to the predictions appeared in the World Population Data Sheet 2016, which country can become the worlds largest in 2050 with regard to the size of population;

i) ☐ Pakistan                      ii) ☐ Brazil                      iii) ☐ India                      iv) ☐ USA
  19. According to World Population Data Sheet 2016, how many births occur worldwide during every passing minute?

i) ☐ 180                              ii) ☐ 280                              iii) ☐ 380                              iv) ☐ 480
  20. The ability of a woman to reproduce offspring is called as;

i) ☐ Fecundity                      ii) ☐ Fertility                      iii) ☐ Sterility                      iv) ☐ Natality

# **The Islamia University of Bahawalpur**

## *Department of Geography*

Final Term Examination (Population Geography GEO-21404) Marks 30  
M. Sc. Geography 4<sup>th</sup> Semester (Date: 07-01-2017) Time Allowed 80 Minutes

**Q. 2 Explain/answer the following briefly (marks 14, time 30 minutes).**

- What is agricultural density and how it can be calculated?
- Differentiate between physiological density and crude density of population
- What the measures of crude death rate?
- How the crude birth rate is calculated?
- Write the names of population wise five biggest countries of the world in a sequence
- Enlist the five main problems associated with expanding population
- Differentiate between Anti-natalist and Pro-natalist population policies

**Q 3. What is population composition? Explain age composition of population (marks 08, time 25 minutes).**

**Q 4. Explain distribution of population over the globe in the light of geographic factors (marks 08, time 25 minutes).**
