

****Terrorism****

The word Terrorism first appeared during the French revolution (1789-1799). Some of the revolutionaries who seized power in French adopted a policy of violence against their enemies. The period of their rule became known as **The Reign of Terror**.

Definition:

"Terrorism is the systematic use of terror or un predictable violence against government, public, or individuals to attain their political objectives." Terrorism has been used by political organization with both rightist and leftist objective, by nationalistic and ethnic groups, by revolutionaries etc.

"Terrorism is the use or threat to violence create fear and alarm. Terrorists murder and kidnap people, set off bombs, hijacking airplanes, set fires and commit other serious crimes." But the goals of terrorists are different from Criminals. Most criminals do crimes mainly for the sake of money but terrorists create fear and alarm for political purpose.

"Everyone is worries about stopping terrorism. Well, there is an easy way stop practicing it."

(Noman Chomsky)

Terrorist acts are committed for various reasons. Some terrorist groups support a particular political philosophy. Other terrorists' organizations represent ethnic groups. Other terrorists' organizations represent ethnic groups to seek liberation from government.

Exploitation of religion for political purpose is an old age phenomenon it is important to remember that all religions have produce deviant and dangerous fringe groups and Islam like Christianity preaches peace and non-violence.

There is no difference between a stealth bomber and a suicidal bomber. They both kill the innocent people for political reasons.

(Tony Benn)

****Terrorism****

Today terrorism is far more devastating than in the past because of the mass media. No story plays better, or longer, then a terrorist act. Today's media like television multiply the fear effect of terrorists by vividly conveying its horror. In the past the terrorists have been ruthless opportunities using bloody but relatively narrow range of weapons. but now a days the terrorists have advanced weapons that can destroy the wide range of area with a single button. It is really alarming for us.

"Wanton Killing of innocent people is terrorism, not a war against terrorism."

(Noam Chomsky)

This grave issue of terrorism demands immediate attention of the world's powers. They need to review their policies on the war against terrorism to end this problem. They should take necessary steps for the issue of terrorism. The governments should maximize the security on borders too eliminate terrorism and finally people should keep eye around them and should report the activity they see.

"I think the debate in our is that people have to agree on zero tolerance against terrorism."

(King Abdullah 2nd)
