**Assignment No. 01**  
**CLO<sub>1</sub>, CLO<sub>2</sub>**

**Q1.** Software is the differentiating characteristic in many computer-based products and systems. Provide examples of two or three products and at least one system in which software, not hardware, is the differentiating element.

**Q2.** The “myths” noted in Section 1.4 are slowly fading as the years pass, but others are taking their place. Attempt to add one or two “new” myths to each category.

**Q3.** Is there ever a case when the generic phases of the software engineering process don't apply? If so, describe it.

**Q4.** Which of the software engineering paradigms presented in this book? And, do you think would be most effective? Why?
