

The Islamia University of Bahawalpur

Department of Homoeopathic Medical Sciences
Materia Medica II, 4th Professional, BHMS

Instructor: Laila Sumreen
Class Day: Monday -Friday
Class Timing: As given in the Departmental time table.

A materia medica is a book the list the medicines used in Homoeopathy along with their indications for the application. The information in a Materia Medica is compiled from proving and clinical observation. Homeopathic materia medica is constructed differently as compared to other materia medicas. Essential & complete knowledge of the drug action as a whole can be supplied only by qualitative synoptic drug experiments on healthy persons & this alone can make it possible to view all the scattered data in relation to the psychosomatic whole of a person & it is just such a person to whom the knowledge of drug action is to be applied. In this way the homoeopathic materia medica provides great scope in the field of medicine

Teaching Methodology:

The class will be conducted in a lecture & discussion environment where the class Instructor will lead discussion, and students will be encourage to participate and ask question at the end or if required during the class session.

SPECIFIC OBJECTIVES OF COURSE:

- Study of Homoeopathic medicines listed in course outlines of this course

COURSE OUTLINES:

- Study of Homoeopathic remedies, emphasizing the following aspects:
- Origin of substance including natural order and species
- Proving era and contributors
- Form and potency used in the process of proving
- Active constituents of Plant Origin Drugs
- Known Pharmacological / Physiological Action of the drug
- Overall drug picture (Schematic)
- Constitution and Temperament
- Background & duration of action
- Clinical importance and its therapeutic use
- Dosage and potency recommended by different physicians
- Relationship and comparative studies with other Homoeopathic remedies

Session No. 1:

- 1.Introduction to Mineral remedy.
- 2.Acid remedies in Materia medica.
- 3.Acid Phos
- 4.Nitric acid

Session No.2, 3:

Presentation / Question answer session

Session No. 4, 5:

Introduction to Kali group
Features of Kali group

Session No. 6:

Kali carb
Kali bich

Session No. 7:

Kali mur
Kali Sulph

Session No. 8

Presentation / Question answer session

Session No. 9:

Intro to Ferum group
Ferrum met

Session No. 10 & 11

Ferrum phos

Presentation / Question answer session

Session No. 12:

Intro to Carbon group
Graphite

Session No. 13:

Petroleum
Presentation / Question answer session

Session No. 14 & 15:

Intro to Sulphates
Hepar sulph

Session No. 16:

Group Discussion about Sulphates

Session No. 17 & 18:

Intro about Magnesium group
Magnesium mur

Session No. 19:

Magnesium carb
Group discussion and Question answer session

Session No. 20& 21:

Intro to Natrum group
Natrur mur

Session No. 22 & 23:

Natrum sulph
Natrum carb

Session No. 24:

Group discussion and Question answer session
Introduction to Mercurius group
Merc cor

Session No. 25:

Plumbum met
Zincum met

Session No. 26 & 27:

Phosphorus
Silicia
Group discussion and Question answer session
